WEAT PRESENTS

TOM ENNIS, P.E., LEED, A.P. AND LEILA GOSSELINK, ENGINEER
“PAH SOURCE ID AND BAN OF PAVEMENT SEALANTS CONTAINING COAL TAR IN AUSTIN”

TUESDAY, MAY 16, 2006 AT 6:00 PM

Joe C. Thompson Center, University of Texas at Austin

RSVP by contacting Pervez Jameel

Call: 512-328-8975 or Email: central@weat.org

by May 10, 2006

Tom Ennis is the Division Manager of Environmental Resource Management Watershed Protection and Development Review Department at the City of Austin. Mr. Ennis currently manages a group of 70 scientists and engineers responsible for water resource evaluation, stormwater treatment, stream restoration, planning, GIS, pollution prevention, water quality monitoring and environmental education. He specializes in the following areas: sustainable site design, natural systems for water, wastewater or stormwater treatment, and civil engineering design on a variety of infrastructure projects for both the public and private sector. From Rose-Hulman Institute of Technology, he received B.S. Civil Engineering with Environmental Option degree.

Leila Gosselink is currently in Environmental Engineering and Data Analysis with the City of Austin and is the Quality Assurance Officer for Clean Rivers Programs. Ms. Gosselink is a former engineering consultant in the Austin area and staff at Tarleton Institute for Applied Env. Research and Public Policy. She received B.S. Mechanical Engineering and M.S. Hydrology degrees from Louisiana State University (the other aggies).

Leila will present data on tracking the source and assessment of environmental impacts and Tom will present policy implementation and national implications.

This newsletter is sent to more than 350 water quality professionals in the Austin area. If you are interested in sponsoring a meeting/newsletter, or if you have information for publication, please contact **Pervez Jameel at 512-328-8975.**

MEETING SPONSORS:

GSWW, INC.

GSWW, Inc. is a full service civil and environmental engineering firm founded in 1975 to provide specialized engineering services such as inflow/infiltration studies and sewer system evaluation surveys. Since that time, the firm has expanded to serve clients in the areas of wastewater collection system rehabilitation design and construction, asset management, geographic information systems, cMOM support and development, information and system maintenance, and water and wastewater treatment. GSWW's field services division provides a full array of services including flow monitoring, field investigations, data management, internal television inspection, internal sonar inspection, and global positioning system surveys. This provides us with significant flexibility in meeting our client's scheduling requirements and allows us to tailor our approach to specific projects based on the scheduling and performance requirements of the project. This dedication to our clients, project performance, and teamwork has earned GSWW, Inc. an excellent reputation throughout the region.

QEA

Quantitative Environmental Analysis, LLC (QEA) is a water quality-focused environmental engineering consulting firm. The company specializes in the development and promotion of technically-sound and cost-effective approaches to the management of surface water quality problems. QEA currently employs over 50 highly-motivated professional, technical, and support personnel in offices in Montvale, NJ, Liverpool, NY, Austin, TX and Glens Falls, NY. QEA's services include: contaminated sediment evaluation; water quality and eutrophication analysis; TMDLs/wasteload allocation development; ecological risk assessment; habitat assessment; contaminated groundwater investigation; coastal engineering; and water resources. QEA serves a diverse array of private and public clients such as: GE; Alcoa; LCRA; USEPA; USDOJ; and NJDEP. Please visit us on the web at: www.qeallc.com for more information.

Young Professionals (YP) Corner

Thank you to all of the volunteers that participated in Texas Water 2006, the conference was a huge success and the volunteers were a big portion of this effort. I look forward to seeing you all again at Texas Water 2007 in Fort Worth as it appears I may have signed up to participate on the host committee again!

I have been offered a great opportunity to transfer to the headquarters office of Carter and Burgess in Fort Worth. Therefore, I will be resigning my post as WEAT YP Chairperson at the May WEAT meeting. Ryan Bell of K Friese and Associates has been identified as a ready and willing participant to take my chairperson spot. I ask that you support Ryan in his efforts as the new YP Chairperson.

Thank you for the opportunity to allow me to serve the Central Texas WEAT section, I have enjoyed getting to know everyone and it has been a great experience.

I look forward to seeing you at the May meeting and at Texas Water 2007.

Kathy Pontesso, P.E.
