

As part of WEAT's **FREE Webinar Wednesdays**, the WEAT Municipal Resource Recover and Design Committee is hosting a new Webinar:

217 and 317 Changes & What They Mean for You!

Wednesday, March 9, 2016

11:30 AM – 1:00 PM

Agenda and Webinar Information

On November 4th, 2015 the TCEQ commissioners adopted revisions to 30 TAC 217, Design Criteria for Wastewater Systems. Changes in 217 include but are not limited to:

- Adding new definitions and clarifying existing definitions;
- Adding design criteria and approval requirements for rehabilitation of existing infrastructure;
- Adding design criteria for new technologies, including cloth filters and air lift pumps;
- Making changes to reflect modern practices, standards and trends; and
- Modifying rule language to improve readability and enforceability.

This webinar takes attendees through the most salient changes in the various subchapters and what impact they will have on you! Join us for a detailed discussion covering important changes in subchapters:

A: Administrative Requirements

B: Wastewater Treatment Facility Design Requirements

E: Preliminary Treatment Units

F: Activated Sludge Systems

G: Fixed Film Filtration Units

H: Natural Treatment Facilities

J: Sludge Processing

K: Chemical Disinfection

L: Ultraviolet Light Disinfection

A Q&A will follow the webinar where you will have the opportunity to ask questions significant to your treatment facility and the changes most important to you!

Online **FREE** Registration available at: weat.org. Or, go directly to:
