Watershed Planning & Watershed Based Plans
CEU Questions

1. What are the major threats to water quality identified during the presentation? Check all that apply.
 - a) Nutrients
 - b) Silt or sediment
 - c) Oxygen
 - d) Iron
 - e) None of the above

2. What are some of the goals that can be achieved with the successful implementation of a watershed plan? Check all that apply.
 - a) Reduce wildlife habitat
 - b) Decrease treatment requirements for raw water to achieve drinking water standards
 - c) Reduce erosion and protect reservoir capacity
 - d) Increase nutrients levels in water
 - e) Improve overall water quality protecting other water uses including recreational use

3. What are some common management measures resulting from a watershed plan?
 - a) Reduce fertilizer use
 - b) Stream erosion protection (restoration of streams or installation of riparian buffers)
 - c) Wastewater Plant and pipelines upgrades (prevent Separate Sewer Overflows – SSOs)
 - d) Installation of Stormwater Best Management Practices
