Wastewater Surveillance Workshop

You're Invited!

Join the Water Environment Federation and the National Wastewater Surveillance System's Houston Center of Excellence at a free one-day workshop focused on optimizing resources and using data for wastewater surveillance programs.

Network

Meet members of the public health and wastewater sectors and exchange ideas

Share Lessons Learned

Identify challenges and discuss strategies for optimizing resources and making data actionable in wastewater monitoring

Solve Problems

Create solutions and frameworks for overcoming challenges associated with resource optimization and data actionability

More details

The workshop will include panel discussions from leading experts and breakout sessions designed to define the needs and challenges for wastewater monitoring resource optimization. Attendees will represent public health and wastewater organizations across the Houston CoE's region. This is an opportunity to connect with other professionals and gain valuable insights in this evolving field.

Need travel support?

This workshop is free to attend. In addition, WEF has a reimbursement program with limited funds in place to help offset some travel expenses based on [GSA rates](#) and the [City Pair Program](#). Lodging options near the venue within these rates can be found [here](#). If an individual's organization permits reimbursements, please contact nwbe@wef.org for more details.
