

**WOMEN OF TEXAS WATER LUNCH, THURSDAY, APRIL 4, 12NOON-1PM,
BALLROOM B.**

The Women of Water lunch will be highlighting a group of amazing women who are managing, designing and constructing work in Houston. With the combination of the Luce Bayou project, the NEWPP expansion, and the large diameter water lines that deliver water all across the greater Houston area, many are calling the combination of these projects the water project in the world.

The panel will include Venus Price, City of Houston; Melinda Silva, Dannenbaum Engineering; Lindsay Kovar, BGE and Meera Victor, Carollo Engineers. This panel will highlight each of the major projects and each of the women's roles in keeping the projects moving forward. Connie Curtis, with Kimley-Horn and Associates, will be moderating the event that is now unofficially being called *Houston's Wonder Women of Water: Delivering Houston's Future Today*.
