

INNOVATION LOUNGE, EXHIBIT HALL, APRIL 2-4

New to Texas Water 2019 is the Texas Water Innovation Lounge curated through our partnership with Imagine H2O. Current companies and technologies in the Imagine H2O accelerator, as well as, alumni and well-fitting accelerator applicants were invited to participate in the inaugural year. Also, invited were technologies from the water clusters and universities. These companies are working to solve some of our most pressing water issues with new and innovative technology and dynamic thinking. The Innovation Lounge aggregates innovative technology entrepreneurs and our water sector leaders creating the opportunity for Texas municipalities to continue to be on the forefront of solving water problems through dynamic solutions for sustainable water management. WEAT understands that the problems of the water sector are often opportunities for resource recovery; but the right thought leaders, technologies, and regulators must meet for opportunities to scale. Innovation is about the way in which we think about problems. Come meet some of today's entrepreneurs that are successfully solving problems differently and have solutions that we will no doubt see in Texas in the coming years.

Thank you to our Partners and Sponsors!
